

# GDI-DE Testsuite

Testbericht

Name	NOKIS AP ISO
Beschreibung	
Testklasse	Katalogdienste: OGC CSW 2.0.2 AP ISO 1.0
Konformitätsklasse	CSW: Level 1.1 (Version 2.0.0, 12.03.2010)
Getesteter Datensatz/Dienst	<a href="http://admin10.env.disy.net/application/servants/de/disy/preludio2/service/cat/csw/v_2_0_2/GetCapabilitiesServant\$Get?SERVICE=CSW&amp;REQUEST=GetCapabilities&amp;VERSION=2.0.2">http://admin10.env.disy.net/application/servants/de/disy/preludio2/service/cat/csw/v_2_0_2/GetCapabilitiesServant\$Get?SERVICE=CSW&amp;REQUEST=GetCapabilities&amp;VERSION=2.0.2</a>
Ausgeführt am	12.03.2012 21:35:41

	Anforderung	Meldung
	Run tests for level 1.1 compliance.	
	Verify that the DescribeRecord operation is implemented and supports the HTTP/SOAP/POST/XML as well as the HTTP/POST/XML method binding.	
	Verify that the GetRecordById operation is implemented and supports the HTTP/GET/KVP method binding.	
	Verify that all of the following assertions hold for the response to an invalid version of a GetRecordById request (HTTP/POST/SOAP/XML binding): 1.the response entity is a valid exception report having "<ows:ExceptionReport>" as the document element; 2.the value of the exceptionCode attribute specifies the appropriate code value.	
	Verify that the GetRecordById request is implemented and supports the HTTP/SOAP/POST/XML method binding.	
	Verify that all of the following assertions hold for the response to an invalid GetRecords request (missing attribute "typeName" of "Query" element: 1.the response entity is a valid exception report having "<ows:ExceptionReport>" as the document element; 2.the value of the exceptionCode attribute specifies the appropriate code value.	
	Verify that the GetRecords operation is implemented and supports the HTTP/SOAP/POST/XML as well as the HTTP/POST/XML method binding.	
	Verify that the GetCapabilities operation is implemented and supports the HTTP/GET/KVP method binding.
